## ABBREVIATIONS USED IN THE DEPARTMENT OF AGRICULTURE FOR TITLES OF PUBLICATIONS

Compiled by CAROLYN WHITLOCK, *assistant editor, Division of Publications,  
Office of Information*<sup>1</sup>

This publication has been prepared to meet the needs of the Department for a list of abbreviations of the titles of publications used in literature citations and bibliographies. The list is as complete as it was possible to make it at the time of submitting it for publication. The frequent changes in the titles of publications and the citations of new ones necessitate corresponding alterations and additions to such a list. To provide for them, the list of abbreviations for single words has been made as complete as possible. In the latter list, German nouns containing an umlaut are entered as if spelled without the umlaut: thus, Gärt., as if spelled Gaert.

The Union List of Serials in Libraries of the United States and Canada, and its two supplements, also the card catalog of the Department of Agriculture Library, have been consulted and followed in the arrangement of entries. The various publications of a society, institution, or other organization have been brought together, the entry being made under the name of the society, etc.

The principal prepositions used in the titles of foreign periodicals have been retained to permit of ready identification. For the sake of uniformity and to obviate errors in proofreading, the principal words in the titles of all periodicals have been capitalized, even though such procedure is at variance with the usage of the countries in which they are issued.

This publication supersedes Department Bulletin 1330, *Abbreviations Employed in Experiment Station Record for Titles of Periodicals*.
